

Creative Mobile Interiors Breaks Ground on New Headquarters

Creative Mobile Interiors, a custom vehicle conversion company in Grove City, Ohio, recently broke ground for its new headquarters in Grove City, just south of Columbus, Ohio. The building will be constructed on eight acres of land located a half-mile up the road from the company's current headquarters at 6497 Seeds Road. The land includes more than 600 square feet of frontage on Interstate 71, a major interstate in Columbus, Ohio.

The company's new headquarters and operational facility will consolidate all operations from the four separate plants it currently leases. The layout of the building and land allows for three expansions for CMI and a total of more than 80,000 square feet of building space. The first phase is 17,500 square feet in office and plant production space.

On entering the building a vestibule leads to both a large glass enclosed reception area and a design center. Adjacent to the design area is a state-of-the-art executive conference room. There are also 12 office areas, a break room, restrooms and a copy room. The production area includes four coach bays, one service bay, and four smaller vehicle bays. This area also has individual rooms for upholstery, electronics, stock, and shipping

Creative Mobile Interiors recently broke ground on a new headquarters and operational facility in Grove City, Ohio. The new location is between Seeds Road and Interstate 71, just southeast of Exit 97, and within walking distance of the existing facilities. The new location will include office and shop space plus plug-ins and a dump station for visiting conversions.

receiving. Offices for the service and production managers are located in the center and the production plant has its own break and bathroom facilities.

The front of the steel building is enhanced with masonry stones and large glass windows. The landscaping includes a pond and fountain and a six-foot ornamental fence surrounding the facility for security. The parking lot allows parking for 40 vehicles and a future campground is planned for visitors in the back of the facility. There are four large double drive-in doors and two wash bays for cleaning and detailing the buses. There are also four outdoor plug-in areas for buses and a sanitary dump station.

"The new building will not only allow us to consolidate our plants but allow room for growth," said CMI President and Founder Owen Connaughton. "We are so excited to be one step closer to moving into our very own building and enhancing our customers' experience. You can see the excitement in the eyes of our employees when talking about our new facility," he said.

CMI was started in a 4,500-square foot shop on the west side of Columbus before moving to its present location in Grove City. It moved into its current facility in April of 2002. Since then, it has added a stand alone service facility, and two additional plants. CMI can be reached at (614) 539-4600 or at www.creativemobileinteriors.com. □
